

# OPTIMIZING

Product Development through Precision Learning

-  Learn from the experts at PTC University
-  Make your organization more productive

# PTC University

Helping customers realize the most out of their PTC products with an unmatched depth and breadth of product development knowledge

- **Innovative Learning Methodology** – Our Precision Learning Methodology is a proven, proprietary approach to developing and delivering learning solutions that have the right combination of content, technology, and services
- **Flexible Delivery Options** – Learn from the most knowledgeable instructors (either in the classroom or virtually), or online using comprehensive, Web-based courses
- **Premier Content and Expertise** – PTC-certified instructors have direct access to the PTC product development team and PTC consulting organization, which means that students are learning the latest tools and techniques from experienced teachers
- **Global Focus** – Courses are available at 100 training centers located across 35 countries, with content available in nine languages
- **Delivering Value** – Results-focused training plans; role-based learning paths

## PTC University offers flexible learning solutions around the world

- **Precision Learning Programs** – Our corporate learning programs are designed to meet your organization's specific goals, current skills, desired competencies and training preferences
- **Instructor-led Training** – Whether its virtual, on-site or a traditional classroom setting, PTC University offers the ideal blend of lectures, personal demonstrations, hands-on workshops, proficiency assessments, and post-classroom tools
- **eLearning Libraries** – Students have 24/7 access to an entire collection of Web-based training courses. Our powerful Learning Management System, Precision LMS, enables both individual users and managers to create precise learning paths for every role within the organization
- **Pro/FICIENCY** – Both students and managers can easily evaluate skills and develop learning plans using our Pro/FICIENCY assessment tool
